The Geology of SICCAR POINT
and the
JAMES HUTTON TERCENTENARY
Thursday 19th March 2026
A Talk by Geologist, Elizabeth Devon

Portrait of **James Hutton**
by Sir Henry Raeburn

© Scottish National Portrait Gallery

James Hutton used **Siccar Point** evidence to argue for a much greater length of geological time than was popularly accepted.

Elizabeth's talk will focus on **James Hutton**, with a brief biography of his life and an overview of the Scottish Enlightenment. She will explain why Siccar Point is one of the world's most important geological sites.

Siccar Point, East Lothian

Berwick Parish Centre

TD15 1DF (Doors open 1.30 for 2.00pm start)
